

## **Compliance Information**

This data sheet details NCC of Australia information relevant to the following ACS metal cladding and roofing products:

- SNAPLOCK
- INTERLOCKING
- NAILSTRIP
- STANDING SEAM
- METAL WEATHERBOARDS

## Brands

ZINCALUME® steel
COLORBOND® steel
COLORBOND® steel Matt
COLORBOND® Metallic steel
COLORBOND® Ultra steel
REDCOR® weathering steel
Unicote® Lux / Unicote® Select

# Tested to NCC Requirements

Our range of Australian-made steel cladding and roofing products has been developed, tested and manufactured to not only meet our country's demanding climatic conditions but also to provide architects, builders and owners with the confidence that comes from using guaranteed compliant products. The compliance statement within this data sheet outlines the compliance of ACS products - SNAPLOCK, INTERLOCKING, NAILSTRIP, STANDING SEAM and METAL WEATHERBOARDS with both the National Construction Code of Australia and the relevant Australian Standards for both Residential and Non-residential buildings. The National Construction Code of Australia (NCC) details the minimum necessary requirements for safety, health, amenity and sustainability that need to be met in the design and construction of new buildings (and new building work in existing buildings).

# National Construction Code Of Australia (NCC) Compliance Statement

**Architectural Metal Cladding & Roofing Product Range** 

### APPLICATION

Architectural Roofing and/or Cladding for class 2 to 9 Buildings (Non-Residential) and class 1 and 10 Buildings (Residential)

#### **SCOPE OF USE**

All products noted below may be used as roof cladding and/or wall cladding when designed using the individual technical data available for each product.

#### **APPLICABLE PRODUCTS**

#### Roofing

• SNAPLOCK

### Walling

- INTERLOCKING
- SNAPLOCK
- NAILSTRIP
- STANDING SEAM
- METAL WEATHERBOARDS

#### **PRODUCT ATTRIBUTES**

Base Metal Thickness Range 0.55mm - 0.75mm

**Min Yield Strength** 300 MPa

Base Material Brand Name	Typical Environments	Material Specification			Warranty	
		Coating	Paint	Solar Absorptance Value	Roofing	Walling
RedCor®  REDCOR® weathering steel	Building facade     Architectural features     Heat exchanger     elements					
<b>Zincolume</b> ® ZINCALUME® steel	For Low to High corrosive environments; > 200m from breaking surf > 100m from calm marine	AM125  125 g/m² minimum metallic coating mass, (aluminium/zinc/ magnesium alloy) with Activate* technology to AS 1397-2011	N/A		Up to 36 years**	Up to 18 years** (Non- residential)
Colorbond COLORBOND® steel	For Low to High corrosive environments; > 200m from breaking surf > 100m from calm marine	AM100 100 g/m² minimum metallic coating mass, (aluminium/zinc/ magnesium alloy) with Activate* technology to AS 1397-2011	Paint Coating to AS 2728- 2013 includes Thermatech* solar reflectance technology*	Range from 0.32 to 0.96	Up to 36 years**	Up to 20 years** (Non - residential) Up to 15 years** (Residential)
Colorbond COLORBOND® steel Matt	For Low to High corrosive environments; > 200m from breaking surf > 100m from calm marine	AM100  100 g/m² minimum metallic coating mass, (aluminium/zinc/ magnesium alloy) with Activate* technology to AS 1397-2011	Paint Coating to AS 2728- 2013 includes Thermatech® solar reflectance technology*	Range from 0.35 to 0.79	Up to 36 years**	Up to 20 years** (Non - residential) Up to 15 years** (Residential)
Colorbond COLORBOND® Metallic steel	For Low to High corrosive environments; > 200m from breaking surf > 100m from calm marine	AM100  100 g/m² minimum  metallic coating mass, (aluminium/zinc/ magnesium alloy) with Activate* technology to AS 1397-2011	Paint Coating to AS 2728-2013 Type 3	Range from 0.34 to 0.93	Up to 30 years**	Up to 20 years** (Non - residential) Up to 10 years** (Residential)
Colorbond COLORBOND® Ultra steel	For Very High to High corrosive environments; > 100m from breaking surf > 0m from calm marine	AM150 150 g/m² minimum metallic coating mass, (aluminium/zinc/ magnesium alloy) with Activate® technology to AS 1397-2011	Paint Coating to AS 2728- 2013 includes Thermatech® solar reflectance technology*	Range from 0.32 to 0.73	Up to 36 years**	Up to 20 years** (Non - residential) Up to 15 years** (Residential)

## Unicote® Lux / Unicote® Select

UniCote® LUX is a premium pre-painted steel product designed to suit Australian high-end architecture. Combining the world's best coil coating technology with rigorous testing to Australian Standards, it ensures not only superior performance in the harsh Australian environment but also a stunning patterned and textured finish.

UniCote® Select effortlessly combines durability with aesthetic allure, showcasing an extensive array of colors and profiles. It harmoniously unites form and function, delivering impeccable quality, low maintenance, and lasting resilience.

## Tested for peace of mind.

UniCote® Steel's performance testing is a testament to its unwavering commitment to quality and durability, instilling unwavering confidence in architects and homeowners alike. Rigorously tested beyond industry standards, it boasts exceptional strength, corrosion resistance, and weather endurance, ensuring architectural visions will stand the test of time.

Homeowners can take comfort in knowing that UniCote® Steel guarantees safety, security, and long-lasting beauty, providing the peace of mind needed to turn houses into homes built to last.

## **Understanding Compliance**

The NCC outlines deem-to-satisfy requirements for metal cladding products based on compliance to Australian Standards. Whilst the applicable Australian Standards differ between Residential and Non-Residential buildings the underlying common tenants are:

a) that installed metal claddings must be able to meet expected Structural, Wind and Installation loads as per the Australian Standards.

b) that installed metal claddings must be sufficiently durable to meet the amenity and sustainability requirements of the Australian Standards.

To determine a metal cladding product's capacities and ability to comply with Australian design standards, these products must be tested in accordance with AS 4040.1. Metal cladding products that cannot demonstrate testing to AS 4040.1 and compliance with other relevant Australian Standards do not meet the deemed-to-comply provisions of the NCC.

ACS metal cladding and roofing products:
SNAPLOCK, INTERLOCKING, NAILSTRIP,
STANDING SEAM and METAL WEATHERBOARDS
have been tested with NATA accredited testing
to meet all relevant Australian Standards as
outlined in this document.

# Compliance Checklist

# Stakeholder Responsibility

It is the primary responsibility of each key stakeholder in the value chain, from architect to supplier to installer to builder to ensure that products used on a building are;

a) Suitable for the intended use, and

b) Comply with relevant Australian Standards and NCC provisions

Increasingly regulatory authorities are requiring documentary evidence of a product's compliance to the requirements of the NCC.

### **Brands**

The ACS range of products: SNAPLOCK, INTERLOCKING, NAILSTRIP, STANDING SEAM and METAL WEATHERBOARDS have been tested with NATA accredited testing to meet all relevant standards and are manufactured using Australia's leading coated steel and prepainted aluminium materials. COLORBOND® steel and ZINCALUME® aluminium/zinc/magnesium alloy coated steel are supplied to ACS in large coils. ACS then fabricates these materials (known as rollforming) into our range of metal cladding and roofing profiles.. Rainwter goods such as gutters, fascias, rainheads, and downpipes are also manufactured by our sister company PPC Flashings.

#### GENERAL DISCLAIMER:

This ACS datasheet is to be used as a guide only and for further technical support or advice, please contact our cladding team, prior to placing your order or any installation works.
